GTA REALTORS[®] RELEASE APRIL 2020 STATS

Home Sales and Listings

- Greater Toronto Area REALTORS® reported 2,975 residential transactions through TRREB's MLS® System. This result was down by 67 per cent compared to April 2019. Weekday sales remained within a relatively steady range during the month, averaging 130 per day.
- New listings amounted to 6,174 in April 2020 down on a year-over-year basis by a similar rate compared to sales (-64.1 per cent).

Home Prices

- The average selling price for April 2020 transactions was \$821,392 up by 0.1 per cent compared to the average price of \$820,373 reported for April 2019. The semi-detached and townhouse market segments experienced annual average price growth above the rate of inflation. The condominium apartment and detached segments experienced year-over-year price declines on average.
- The trend for the MLS® Home Price Index Composite Benchmark, which had been on an upward trajectory since the beginning of 2019 flattened in April. On a year-over-year basis, the Benchmark was up by 10 per cent.
- The MLS® HPI indices represent prices for typical homes with consistent attributes from one period to the next. The fact that the MLS® HPI was up year-over-year by a greater rate than the average selling price suggests that the share of higher end deals completed in April 2020 versus April 2019 was down.
